UK PARKINSON’S EXCELLENCE NETWORK

The UK Parkinson’s Excellence Network is for everyone involved in Parkinson’s care.

It’s been established to drive improvements in services, experiences and outcomes for people affected by Parkinson’s by:

• strengthening the voice of people affected
• equipping professionals to influence services
• developing the right expert workforce
• enabling professionals to work together for change

How the Network can help you

Resource centre

An online resource centre enables professionals to share:

• a range of tools to support service improvement, including the strengthened UK Parkinson’s audit, template business cases and frameworks for developing care pathways
• comprehensive information about education and training in the field of Parkinson’s and a range of online learning
• resources to help engage people affected, enable them to take control and make sure the voice of service users drives improvement
• opportunities to work together for change, including research and service improvement collaborations and peer support

Expert support

Through the Network you can get targeted support with service improvement, workforce development, collaboration and user involvement from Parkinson’s UK.

Leadership for change

Regional groups of Parkinson’s professionals are being set up to provide leadership at a local level. Groups focusing on key themes such as underserved groups and research engagement will lead activity on these issues. See inside for full details.

Get involved

For more information visit parkinsons.org.uk/excellencenetwork, contact your relevant local or theme lead or excellence@parkinsons.org.uk

Be part of changing the future of Parkinson’s.
A DEDICATED TEAM FROM PARKINSON'S UK TO SUPPORT THE EXCELLENCE NETWORK

**UK OVERSIGHT GROUP**
- **Clinical Director**, UK Parkinson's Excellence Network: David Burn (david.burn@ncl.ac.uk)
